UPDATING TO 2027 CDT CODES IN Opendental software

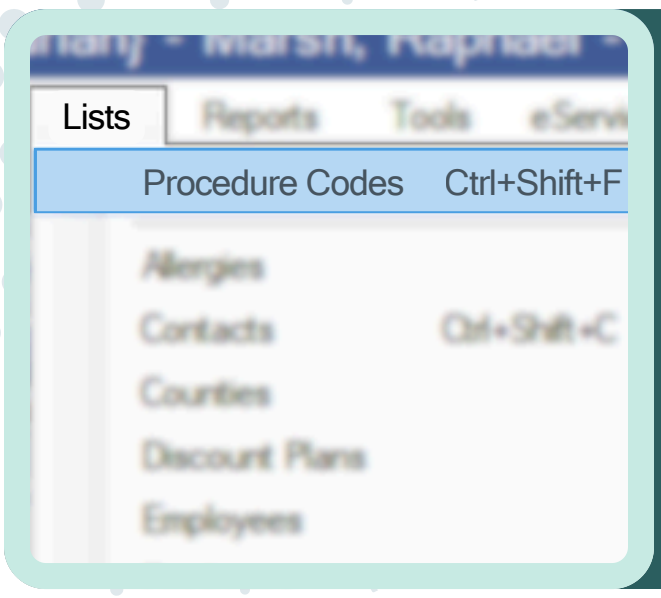

REMINDER:

We recommend waiting to run this tool until after you have seen your last patient in 2026. This will make sure you're still billing the correct codes before the year ends.

1. UPDATE OPEN DENTAL

2027 CDT Codes are available in Open Dental versions 26.1.73, 26.2.34 or greater.

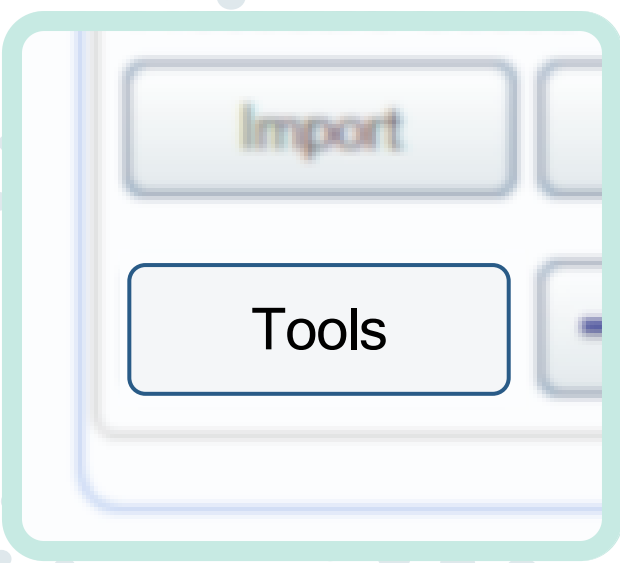

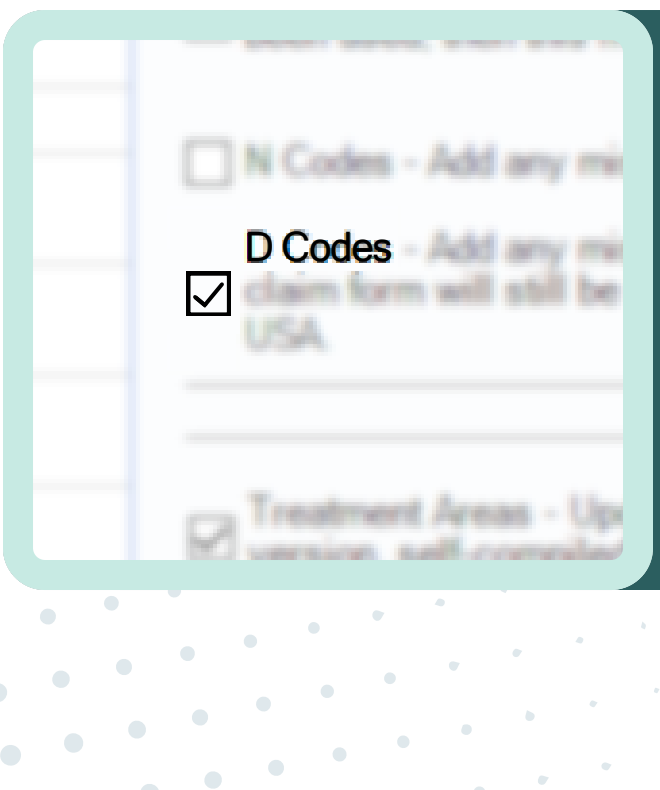

2. OPEN THE PROCEDURE CODES LIST

From the Main Menu, go to Lists, Procedure Codes.

3. OPEN PROCEDURE CODE TOOLS

In the Procedure Codes window, click the **Tools** button. Users must have the ***Security Admin*** and ***Procedure Code Edit*** permissions to access these tools.

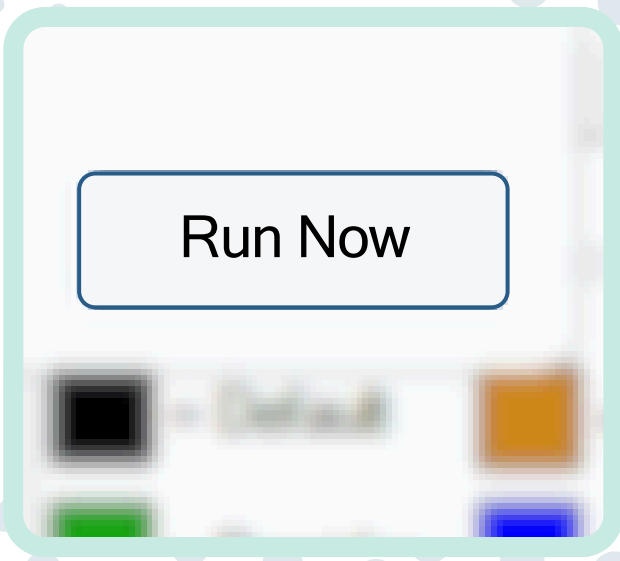

4. CHECK "D CODES"

This option will add new CDT codes and update any existing codes to match the 2027 changes.

5. CLICK "RUN NOW"

Click through the prompts indicating codes have been updated. Once you've gone through the prompts, the code updates are available in Open Dental.

LOOKING FOR MORE?

Click the **?** icon from any window in Open Dental to access the Help Feature and find more detailed information and instructions.
